

Task 1-GIT Repository

Step 1:- Create a GIT Hub account.

Step 2:- Open repositories section and create a new repository.

Step 3:- Name repository as enrollment number.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner * KavyGajjar / Repository name * 2301031800045
2301031800045 is available.

Great repository names are short and memorable. Need inspiration? How about [vigilant-waddle](#)?

Description (optional)

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:

☒ Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore
.gitignore template: None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license
License: None

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

ⓘ You are creating a public repository in your personal account.

Create repository

Step 4:- Create 2 folder name as Assignment_1 and Assignment_2.

KavyGajjar / 2301031800045

Set up GitHub Copilot
Use GitHub's AI pair programmer to autocomplete suggestions as you code.
[Get started with GitHub Copilot](#)

Add collaborators to this repository
Search for people using their GitHub username or email address.
[Invite collaborators](#)

Quick setup — if you've done this kind of thing before

[Set up in Desktop](#) or [HTTPS](#) [SSH](#) `https://github.com/KavyGajjar/2301031800045.git`

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

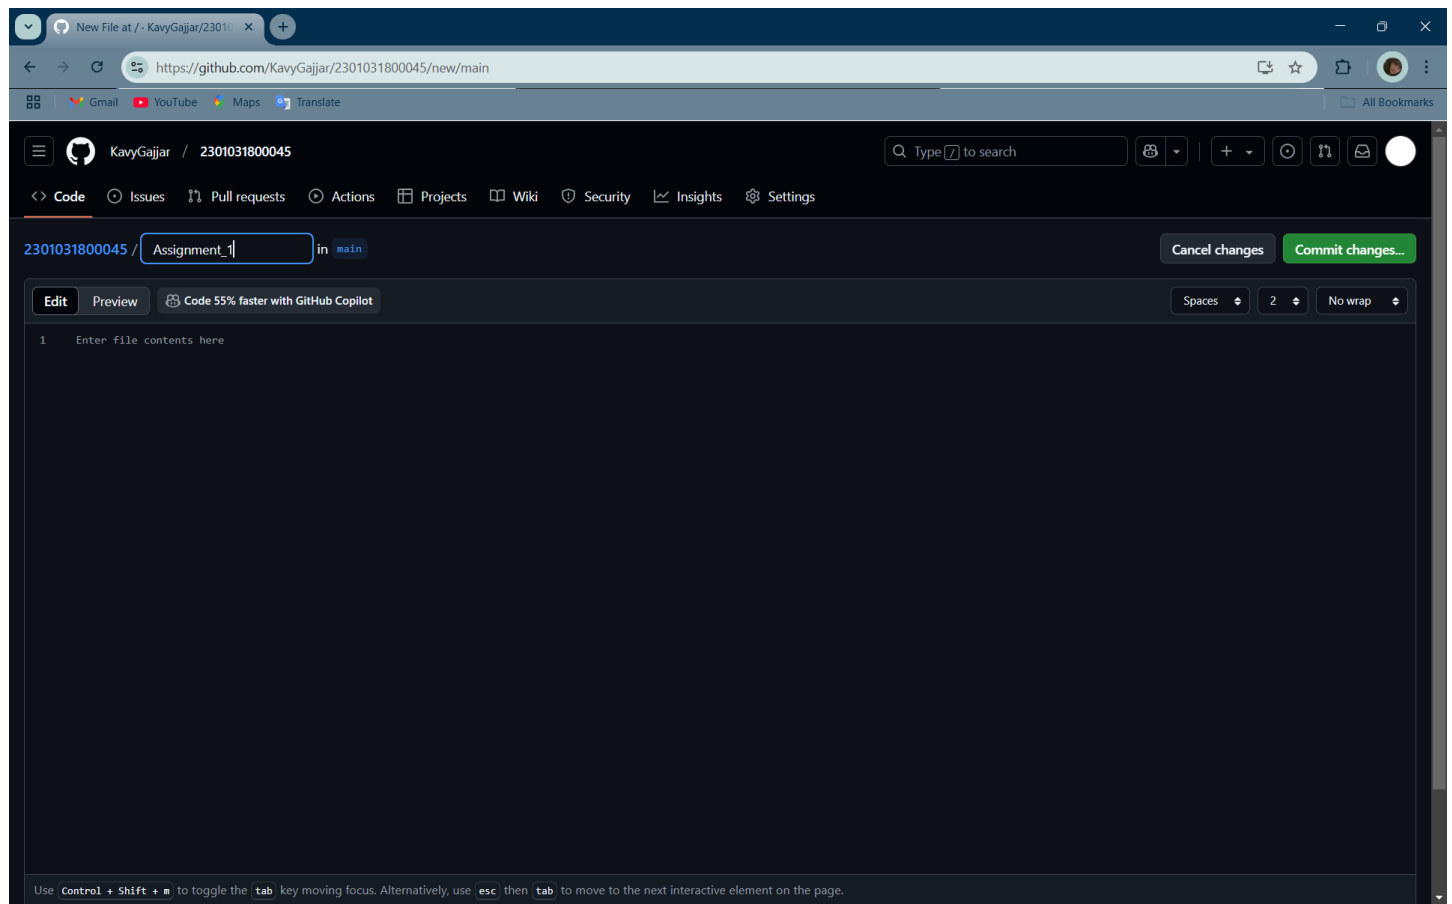

...or create a new repository on the command line

```
echo "# 2301031800045" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/KavyGajjar/2301031800045.git
git push -u origin main
```

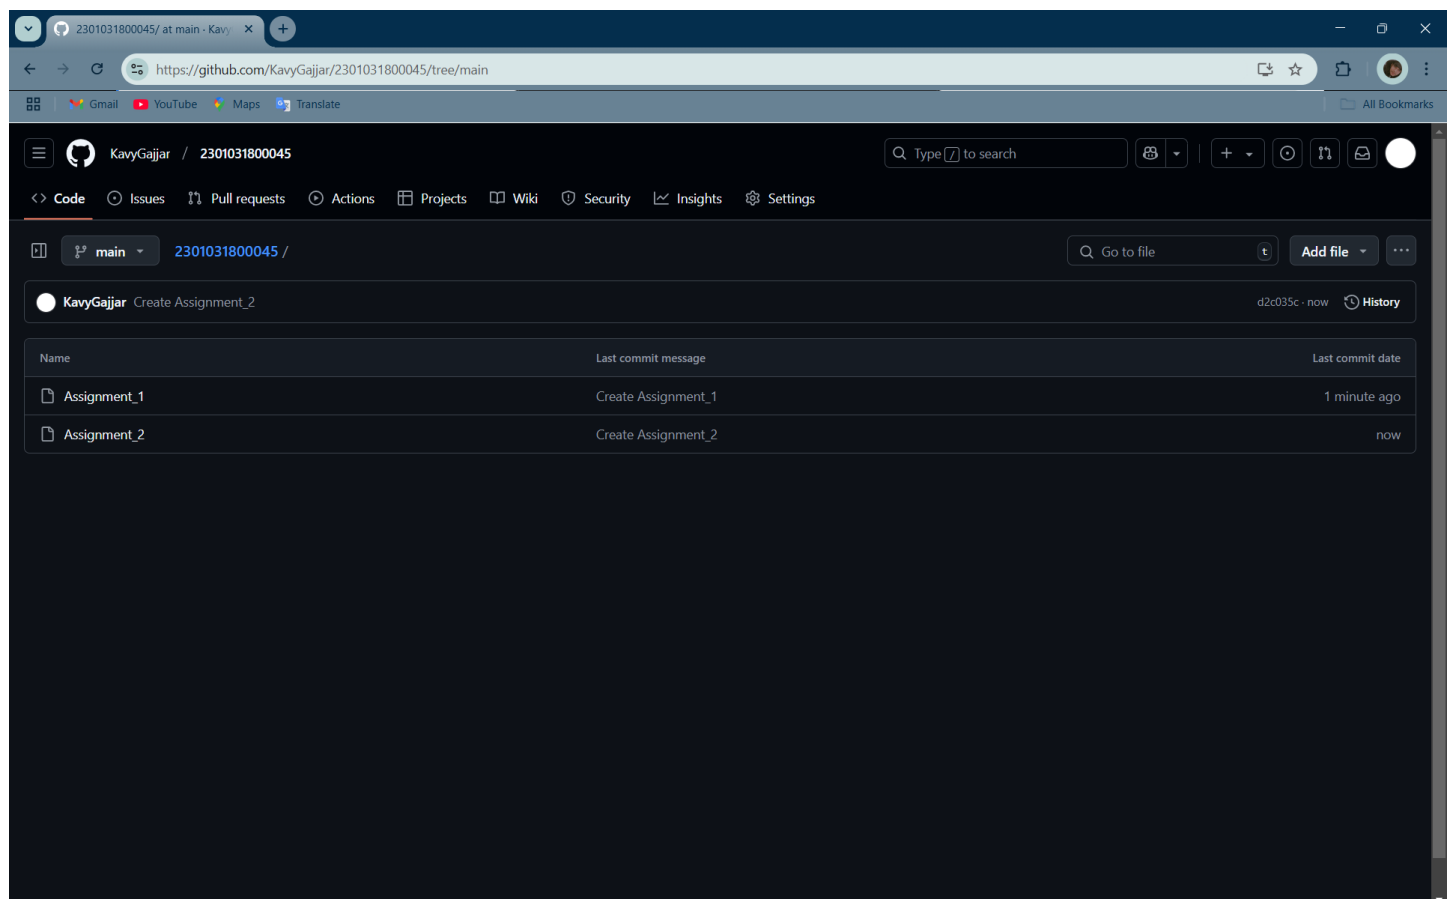

...or push an existing repository from the command line

```
git push https://github.com/KavyGajjar/2301031800045.git
```

Step 5:- Create folder name Assignment_1 and click on commit changes.

Step 6:-Repeat this with Assignment_2.

Completed Task 1
